

Reinventing The Wheel

Royal Roulette is a new ball and wheel chance game that has re-invented the wheel by incorporating the two most successful and recognizable Table Game formats in the casino industry.

This new game adopts the traditional roulette processes but has been innovative in the way that it has brought traditional playing cards to the roulette wheel, increasing the odds available to the player, yet maintaining the familiar playing patterns that roulette players know so well.

Royal Roulette is dealt and played exactly as Roulette, the ball and wheel are spun by the dealer in alternate directions and the winning bet is determined by the card the ball lands on. The wheel instead of having 0 – 36 has a full deck of cards on it, as does the layout.

Players bet in the same manner to Roulette, however because of the number of available options the payouts to players are increased to betting ratios of 47:1 compared to the traditional roulette game of 35:1. As Royal Roulette utilizes all the elements of Roulette, the only requirement of a Roulette dealer and player is to learn the higher payouts.

The games greatest strength is that it brings together the two

most popular formats, the popularity of cards (Ace – King, HCDS) with the simplicity of the roulette wheel on the one betting format.

XN Corporation Africa has been appointed distributor of the game Royal Roulette in South Africa.

Key Benefits

- 4% House advantage
- More betting options
- Productivity enables lower minimum bets
- Higher payout to players
- No player education required to enjoy the thrill of winning
